OBJECTIVE

A hardworking, ambitious, task focused person always ready to empower knowledge and gain experience. I am eager to be challenged to grow and improve my skills. My career objective is to be part of an organization that provides a healthy competitive environment that will help in polishing my professional skills.

EXPERIENCE

July 2022- Present

Sr. Software Engineer (React Native & React JS). Paysys Labs

Hand on experience with REACT JS for developing web apps such as internet banking apps and back offices of the apps as well as React Native for Banking Mobile Apps and Product App

Strong working experience on ReactHooks to use state and lifecycle methods inside functional components with Redux to manage the application state and applying middleware such as Redux-Toolkit and Thunk.

Generating SSL Pinning certificates for secure services integration as well implementing third party api Integration, like Google, Facebook, Discord, Firebase. Integration of payment methods such as RAAST, PAYPAL and GOOGLE-PAY

Worked on React Native CLI Firebase Notifications along with Firebase Crashlytics and Analytics Integration.

Implementation of bridging in both android and ios for integration of native code implementation and SDKs.

Strong understanding and hands on experience with local storage like async storage and keychain for mobile apps and heap storage, cookies and local storage for web apps.

Done Projects and Sprints as a Leading Capacity coupled with Mentoring and Training Juniors for various projects.

Implemented CI/CD pipelines using GITLAB to ensure high quality code and reducing deployment time.

Strong knowledge of version controls such as GITHUB and GITLAB for maintaining difference features and implementation on projects as well as separating projects environments.

Collaboration with PM and clients for best results of the projects. Review code of team members to maintain structured code for reusability and follow best practices.
